

## TOWN AND COUNTRY—SC400

Designed for city bicycling with gentle geometry for a soft, forgiving ride. The long wheelbase of the SC400 provides for especially stable and comfortable cycling. Moderate width tires cushion the bike and rider against city street bumps and the stones along your favorite dirt road. Upright handlebars and a soft saddle round out this truly functional bicycle, built for civilized (and fun) cycling.

*The Town and Country bicycle brings back the joy of cycling you used to know as a kid.*
